Montana Fish Wildlife & Parks supports the Northwest Power and Conservation Council's (NPCC) Mainstem Amendment operation of Libby and Hungry Horse Dam. We urge the federal executives to implement the operations at Libby and Hungry Horse dams beginning this summer (2004). The attached proposal (parts 1 and 2) contains resident fish monitoring called for by the NPCC Mainstem Amendment and referred to in the comments submitted by Montana's Council members. This monitoring plan is needed to assess the response of resident fish to the new operations at the Montana Dams. If both parts of our proposal were not received with this comment, please contact me at (406)751-4546 or the above email address.
